

# A Journey Through the Modes

Modes for the Scale of C Major and what makes them Different from their Natural Minor or Major counterpart

\*This Chart can be universal to all keys by using the numbers

| # | Mode                      | Scale<br>Colored note = Character note of mode                               | Character<br>Difference |
|---|---------------------------|------------------------------------------------------------------------------|-------------------------|
| 1 | Major<br>C Ionian         | 1 - 2 - 3 - 4 - 5 - 6 - 7 - 1<br>C - D - E - F - G - A - B - C               |                         |
| 2 | Minor<br>D Dorian 6th     | 1 - 2 - 3 - 4 - 5 - <b>6</b> - 7 - 1<br>D - E - F - G - A - <b>B</b> - C - D | <b>#6</b>               |
| 3 | Minor<br>E Phrygian 2nd   | 1 - <b>2</b> - 3 - 4 - 5 - 6 - 7 - 1<br>E - <b>F</b> - G - A - B - C - D - E | <b>b2</b>               |
| 4 | Major<br>F Lydian 4th     | 1 - 2 - 3 - <b>4</b> - 5 - 6 - 7 - 1<br>F - G - A - <b>B</b> - C - D - E - F | <b>#4</b>               |
| 5 | Major<br>G Mixolydian 7th | 1 - 2 - 3 - 4 - 5 - 6 - <b>7</b> - 1<br>G - A - B - C - D - E - <b>F</b> - G | <b>b7</b>               |
| 6 | Minor<br>A Aeolian        | 1 - 2 - 3 - 4 - 5 - 6 - 7 - 1<br>A - B - C - D - E - F - G - A               |                         |
| 7 | Minor<br>B Locrian 5th    | 1 - 2 - 3 - 4 - <b>5</b> - 6 - 7 - 1<br>B - C - D - E - <b>F</b> - G - A - B | <b>b5</b>               |

\*When following this chart in a specific key, it's not necessary to sharpen or flatten the colored note to play the desired mode. That happens on its own due to the set intervals of the major scale and beginning on the specific note of that mode. So just tune to C major, leave the levers the way they are, and where you begin defines your mode.

The Character column shows how the mode differs from the Major/Minor scale of same root
